

Fibromyalgia PSA

I'm Idaho's First Lady Lori Otter and I want to tell you that for thousands of people who live every day with chronic pain there is hope. Fibromyalgia and related diseases affect tens of thousands of Idahoans and for years treatments were difficult or unavailable, but now doctors have treatments that can help relieve the pain. Join me and the American Chronic Pain Association and help manage chronic pain. For more information about how you or your loved one can go from patient to person again visit www.theacpa.org.
