Every year more than 15,000 people aren’t there anymore because they accidentally or knowingly misused an opioid medication. Gone because someone was careless. If you’ve been prescribed opioids, please don’t take chances. Follow your dosage plan exactly. Keep track of your meds. Store them securely. Disposes of them properly. And never ever share. Drugs can control your pain but it up to you to control your drugs. Because, isn’t there enough pain already?
